

Coding level:  source level (n = 184)

 source × application group (n = 295)

 derived analytical output

ROUTE 1 · Source-level operational rules

ANALYTICAL OUTPUTS

RQ1 · Who governs acceptance?

Authority level of acceptance rules

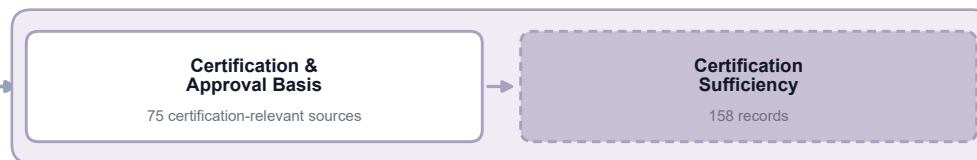

ROUTE 2 · Application-level compatibility

RQ2 · Which applications are compatible?

Function-specific compatibility profile

ROUTE 3 · Certification sufficiency

RQ3 · Is certification sufficient?

Certification–acceptance gap

Sensitivity check: national sources (n = 25) vs sources below national level (n = 159)

EVIDENCE BASE

Corpus construction

36 OECD countries
184 grey-literature sources

Discovery: multilingual web ·
targeted official sites · LLM-assisted

Inclusion (3 criteria): public ·
authority type · operational rule

Coding framework

regex-based Python coding

Source level n = 184

Source × application n = 295
